

Ageing *Better*

→ in Lincolnshire

This year's report is based on the WHO Age Friendly Communities Framework which we applied to the growing, older Lincolnshire population.

Themes for Action

To enable this population to stay well and independent for as long as possible, we identified four common threads for action:

Social Isolation

Transport

Digital Exclusion

Housing

These themes are known to provide the most challenges for those living with the most inequalities.

Our Challenge

There are many opportunities for older people, if able, to participate socially and actively in the county. Our challenge is to bridge the deprivation barrier for those most at risk of exclusion.
