Joint Strategic Needs Assessment

What is a JSNA?

The Joint Strategic Needs Assessment (JSNA) provides a common view of population health and care needs using evidence from various sources to guide the planning and commissioning of health, wellbeing, and social care services.

The JSNA includes evidence about:

- Health conditions
- Current services & gaps
- Unmet needs & effective interventions
- Health behaviours (e.g. smoking, diet, exercise)
- Health inequalities & social factors

The Lincolnshire JSNA

The Lincolnshire JSNA follows the Marmot approach to address health inequalities across all ages. Information is divided into three sections which focus on the life course:

Start Well
Children and young people

Live Well
Working age adults

Age Well
Older adults

How is the JSNA used?

A shared understanding of local health and care needs supports everyone to:

Make smart, evidence based decisions

Shape meaningful priorities & plans

Commission & target services effectively

Reduce health inequalities

Accessing the JSNA

The Lincolnshire JSNA is available on the Lincolnshire Health Intelligence Hub, which also hosts a comprehensive collection of evidence and documents. Visit www.LHIH.org.uk/jsna to access these resources.

The JSNA is regularly updated, and everyone's input is valued. If you would like to contribute, please contact JSNA@lincolnshire.gov.uk.
